

Music 106 Equipment Instructions

The media system in this classroom has been updated to allow for maximum flexibility in displaying audio and video sources, by allowing you to send one source's video output to the projector, and another source's audio output to the speakers as well as providing a HDMI cable for devices that have a digital connection.

Touch the screen to start the system. This will allow you to select sources and begin using audio.
The video projector will come on and the screen will lower automatically the first time you select a video source.

STEP 1
Select a device from the list on the left side of the touch panel.

The selected VIDEO and AUDIO sources will be displayed in the blue boxes above the Video and Audio buttons.

The "EXIT" button will allow you to shut the entire system down

STEP 2
Select "VIDEO" to display the source on the projector

STEP 3
Select "AUDIO" to hear it from the speakers

Adjust the volume of the audio source up and down, or mute audio.

These buttons will manually control the video projector
